Published by the Public Information and Publications Section, Minnesota Department of Education, 810 Capitol Square, St. Paul, MN 55101

This report contains statistical profiles of Minnesota public school districts for the 1981-82 school year. It is the tenth annual issue in a series of statistical reports published by the Minnesota Department of Education

The primary purpose of the report is to provide a convenient source of accurate and comparable school district data for a single school year. The report includes data on students, staff, revenues, expenditures, and other topics.

Explanation of Contents

Most of the report consists of statistical tables. The tables on pages 15 through 36 display thirty-eight separate statistics for each of the 432 school districts which offered elementary and secondary education during the 1981-82 school year. Districts are grouped by county, based on the county in which the district offices are located. Counties are listed in alphabetical order, and districts are in alphabetical order within each county.

The next set of tables, on pages 37 through 42, displays county, region, and state totals for the same 38 statistics included in the school district tables.

Pages 43 and 44 contain two additional tables. The first lists data for five unique school districts – three districts which operate only elementary schools and two districts which directly operate no schools. The second table lists totals for all districts in each of ten enrollment size categories; this allows easy comparison of districts that are similar in enrollment size.

Finally, the summary statistics table, on pages 45 and 46, displays the state total, the highest and lowest values, the median value, and various percentile values for each of the 38 statistics included in the report.

The first 13 pages of the report are intended to make the statistical tables easier to use and understand. Pages 4 through 9 contain explanations of some important trends and patterns in elementary and secondary education, illustrated by data from the report. Pages 10 through 12 contain definitions for the 38 statistics included in the tables. Pages 13 and 14 contain an alphabetical list of all school districts and a state map, to aid in locating districts in the statistical tables.

Notes on Financial Data

In the 1980-81 school year, all school districts began using a new account structure and a new set of standards for reporting financial information. These new standards are called the Uniform Financial Accounting and Reporting Standards (UFARS).

Because of the switch to UFARS, it was impossible to retain the expenditure categories used in *School District Profiles* prior to 1980-81. Thus the expenditure categories (columns 18 through 33) in the last two issues of the report are very different from the categories in previous issues.

The definitions on pages 11 and 12 provide a general explanation of what is included in each category. In addition, Table 1 shows the specific UFARS funds, programs, and objects included in each category.

Users of the financial data should be aware that the UFARS account structure is new and is very different from account structures which school districts used in the past. As a result, there have been some inconsistencies in the ways that districts have reported revenues and expenditures.[1] For example, under UFARS standards principals' salaries are treated as administrative expenditures. Most districts followed this standard, but some districts reported principals' salaries as instructional expenditures, which is consistent with the accounting standards used prior to 1980-81. Another example is expenditures for employee benefits, such as health insurance and life insurance. Some districts included these expenditures in the same categories as the employees' salaries; this is consistent with UFARS standards. Other districts reported all employee benefits expenditures in a separate category, with "other operating programs."

These inconsistencies do not affect the total expenditures reported by each district. Thus, it is

[1]Department of Education staff contacted nine school districts for which the expenditure data appeared questionable, and obtained revised data for use in this report. In most cases, the problems were due to groups of expenditures being reported in the wrong programs. For these districts, expenditure data in this report may differ from other published data. The nine districts are Bloomington, Brooklyn Center, Chaska, Proctor, St. Francis, St. Paul, South Washington County, Winthrop, and Worthington.

Table 1

Sources of Expenditure Data for *School District Profiles*

This table is intended primarily for persons who are familiar with UFARS, and who wish to trace or verify the expenditure data for a specific school district.

Each of the 16 expenditure categories in *Profiles* includes all expenditures within a defined set of funds, programs, and objects, as defined in the upper section of the table below. The lower section of the table summarizes the funds, major program categories, and object categories used for *Profiles*.

For a further explanation of UFARS, and for definitions of specific funds, programs, and objects, see: Minnesota Department of Education, *Manual for the Uniform Financial Accounting and Reporting System for Minnesota Schools* (St. Paul, 1981 edition).

Categories Used in the Report	Funds*	Programs**	Objects***
18. District and school administration	1 and 9	1-99	
19. District support services	1 and 9	100-199

probably valid to compare total K-12 operating expenditures (column 29) among districts. But for any of the more specific categories, care should be used in comparing districts. For example, if district A reports higher administrative expenditures than district B, it may be because district A has more administrators or it may be because the two districts code their expenditures differently. Some inconsistencies of this type will always exist. But the consistency of the UFARS data should improve in future years, as standards are clarified and as people become more accustomed to the system.

Paired Districts

In 1979 the state legislature passed a law which allows two or more school districts to jointly provide educational programs if they establish a "pairing" agreement. For example, one district could maintain a junior high school for both districts, and the other district could maintain a senior high school. Such an arrangement might save money for both districts, while permitting them to offer broader and more varied secondary programs.

In 1981-82, the following fourteen districts operated under pairing agreements:

Kensington (#209) and Hoffman (#265)
Sioux Valley (#328) and Round Lake (#516)
Tyler (#409) and Russell (#418)
Marshall (#413) and Lynd (#415)
Renville (#654) and Sacred Heart (#655)
Magnolia (#669) and Luverne (#670)
Echo (#893) and Wood lake (#896)

These districts are included in the tables in this report. However, some of the data may not be comparable to data for other districts, for two reasons. First, unlike the other districts in the report, most of the paired districts do not provide a complete elementary-secondary program. Second, the pairing agreements may require sizeable transfers of funds between districts; this may distort the revenue and expenditure data.

Because of this lack of comparability, the Department of Education has prepared a supplementary report, entitled "Profiles of Paired Districts, 1981-82." The supplementary report shows combined data for each of the seven pairs of districts; it includes the same 38 statistics included in this report. Thus, for example, it shows the total combined expenditures per pupil unit for the Echo and Wood Lake districts. These combined totals are more truly comparable to the data for other school districts in this report.

If you would like a free copy of "Profiles of Paired Districts, 1981-82," please contact the Education Statistics Section at the address or telephone number listed below.

For More Information

Additional copies of *School District Profiles, 1981-82* may be purchased from the Minnesota State Documents Center, at 117 University Avenue, St. Paul, MN 55155 (telephone 612-297-3000; or toll free in Minnesota 1-800-652-9747).

The Department of Education has a limited supply of the previous nine issues of *School District Profiles*. Single copies of individual issues may be obtained, free of charge, from the Education Statistics Section, at the address or telephone number below. Please note, however, that copies of the current issue must be purchased from the State Documents Center.

If you have questions or comments about the information in this report, or if you would like further information on related topics, please contact the Education Statistics Section.

This section describes some important trends which have occurred over the past ten years, and some patterns of variation among school districts.

Number of Students

The total average daily membership (ADM) of Minnesota public schools for 1981-82 was 728,637 students. This total signifies a decline of 22,000 students, or 3 percent, from 1980-81.

The ADM of individual school districts ranged from 87 students (in Humboldt) to 39,316 students (in Minneapolis). Most of the state's school districts are near the lower end of this range. Table 2 shows that nearly 40 percent of the districts had fewer than 500 students. But these districts accounted for only 7.5 percent of the state's students. By contrast, the largest 10 percent of the districts (those with 3,700 or more students) accounted for 53.8 percent of the state's students.

Percent Attendance

The state average percent attendance for 1981-82 was 94.7 percent. This means that on an average school day, 94.7 percent of the students enrolled in the state's public schools actually attended school, and 5.3 percent were absent.

Attendance habits are remarkably similar in districts throughout the state. Ninety percent of the districts had attendance percentages within the narrow range from 93.5 to 96.6 percent. In general, attendance percentages were lower than the median in the Twin Cities metropolitan area and in northern and east central Minnesota. Attendance percentages were generally higher in southern and west central Minnesota.

Professional Staff

During the late '70s the total number of professional staff employed by the state's public schools changed very little. The total declined from 49,995 in 1977-78 to 49,444 in 1980-81, a drop of only 1.1 percent (see Table 3). But during the same time period the enrollment of the schools declined by nearly ten percent. As a result, the state total pupil-staff ratio declined steadily, from 16.7 in 1977-78 to 15.2 in 1980-81.

The totals for 1981-82 show a change in this trend. The total number of staff declined by more than 1,200, the biggest drop in any year since 1976-77. As a result, the pupil-staff ratio stayed nearly constant, declining from 15.2 to 15.1.

Pupil-staff ratios varied greatly among districts, from a low of 6.2 to a high of 21.6. Figure 1 shows that variations in pupil-staff ratios were closely related to district enrollment. The state's smallest districts (those with fewer than 245 students) had an average pupil-staff ratio of 10.9, the lowest average of any group. The average pupil-staff ratio shown on Figure 1 increases gradually as district size increases. The largest districts (those with 3,700 or more students) had an average ratio of 15.9, nearly 50 percent higher than the first group.

Other studies have shown similar differences in

Table 2

1981-82 Resident Average Daily Membership (ADM) for Ten Enrollment Size Groups

Group Number	Size Range (1981-82 Resident ADM)	Number of Districts	Total Resident ADM	Percent of State Total
1.	0 to 244 students	42	7,937	1.1%
2.	245 to 314 students	44	12,204	1.7
3.	315 to 414 students	43	15,648	2.1
4.	415 to 499 students	42	19,270	2.6
5.	500 to 669 students	43	25,159	3.5
6.	670 to 859 students	42	31,859	4.4
7.	860 to 1199 students	44	43,939	6.0
8.	1200 to 1799 students	45	64,821	8.9
9.	1800 to 3699 students	44	115,483	15.8
10.	3700 or more students	43	392,317	53.8
	State Totals	**432**	**728,637**	**100.0%**

staffing patterns between small and large school districts. Small districts generally have relatively low pupil-staff ratios and relatively small classes. Large districts generally have higher pupil-staff ratios. But the staff in large districts have, on average, more years of experience, more graduate education, and higher salaries than the staff in small districts.[1]

[1]These findings are reported in: Minnesota Department of Education, "Description and Evaluation of the Effects of the Grandfather and Replacement Levy Limitations and Aids," (St. Paul, 1982).

Table 3

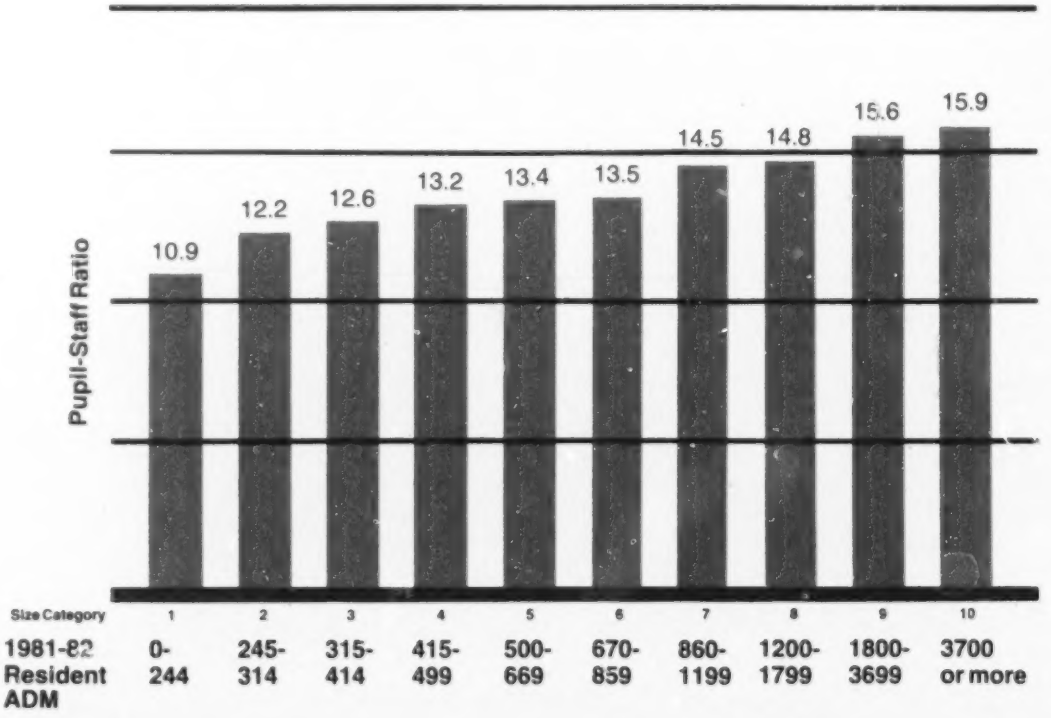
State Totals* of Professional Staff and Pupil-Staff Ratio, 1976-77 through 1981-82

School Year	Total Professional Staff	Pupil-Staff Ratio
1976-77	50,898	16.9
1977-78	49,995	16.7
1978-79	49,723	16.2
1979-80	49,391	15.7
1980-81	49,444	15.2
1981-82	48,236	15.1

*These totals include all elementary-secondary staff of the 432 districts listed in the tables on pages 14 through 35.

Figure 1

Average Pupil-Staff Ratios, 1981-82 For Ten Enrollment Size Groups



Tax Rates

Figure 2 shows the trends in school property tax rates over the past ten years. The state total school tax rate, measured in EARC mills, declined from 43.33 mills in 1975 to 27.22 mills in 1981, a drop of 37 percent in six years.

This decline in tax *rates* does not mean that the actual taxes paid by property owners declined during this period. For example, if the tax rate for a particular piece of property declined but the assessed valuation increased, the tax levied on the property might stay the same or even increase. This example is fairly representative of what occurred in Minnesota from 1975 through 1981. Property values rose very rapidly, and the legislature responded with several steps designed to hold down property taxes.

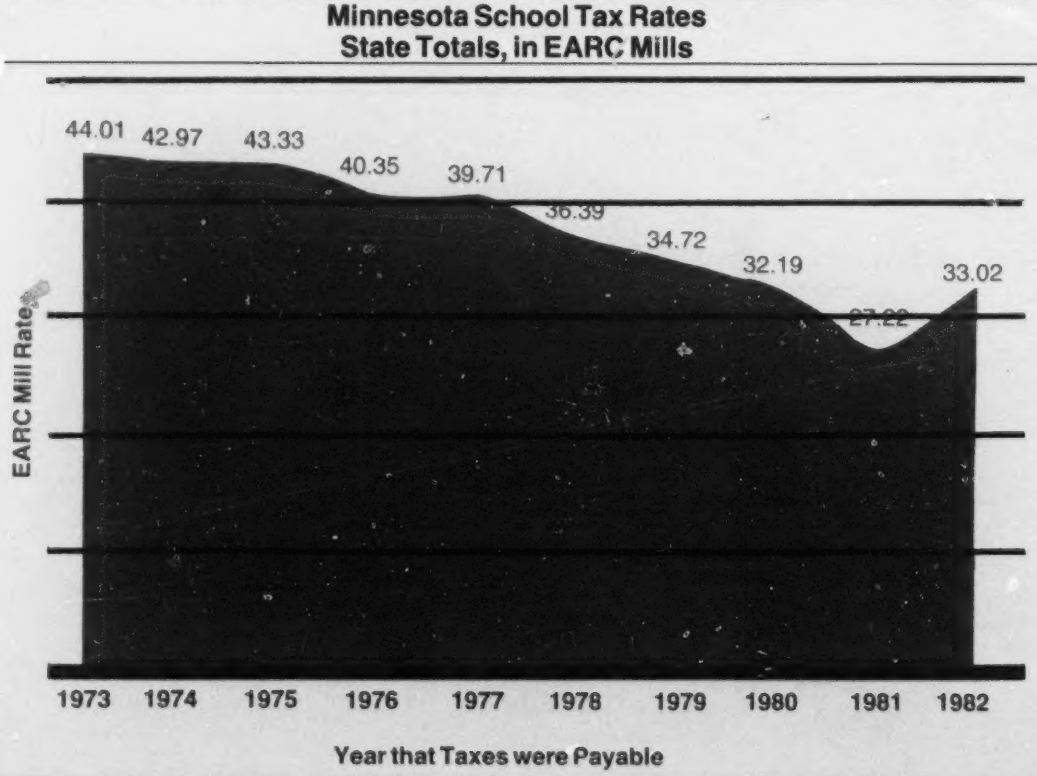
The steady decline in tax rates ended in 1982. The school property tax rate for taxes payable in 1982 was 33.02 mills — almost six mills higher than the rate for 1981. There were three major causes of this increase. First, the "basic maintenance" mill rate, which all school districts must levy in order to receive full state foundation aid, was raised from 21 mills to 24 mills. Second, the "discretionary" mill rate, which local school boards may choose to levy, was raised from 1 mill to 2.25 mills. Third, more districts received voter approval for additional "referendum levies."

Sources of Revenue

In 1981-82, Minnesota school districts as a whole received 5 percent of their revenue from the federal government, 59 percent from the state, and 36 percent from local taxes and other sources.

Figure 3 shows how these percentages have changed in the last ten years. From 1972-73 through 1980-81, the percentages remained fairly constant. The federal share varied from 5 to 6 percent, the state share from 52 to 54 percent, and the local and other share from 40 to 42 percent.

Figure 2

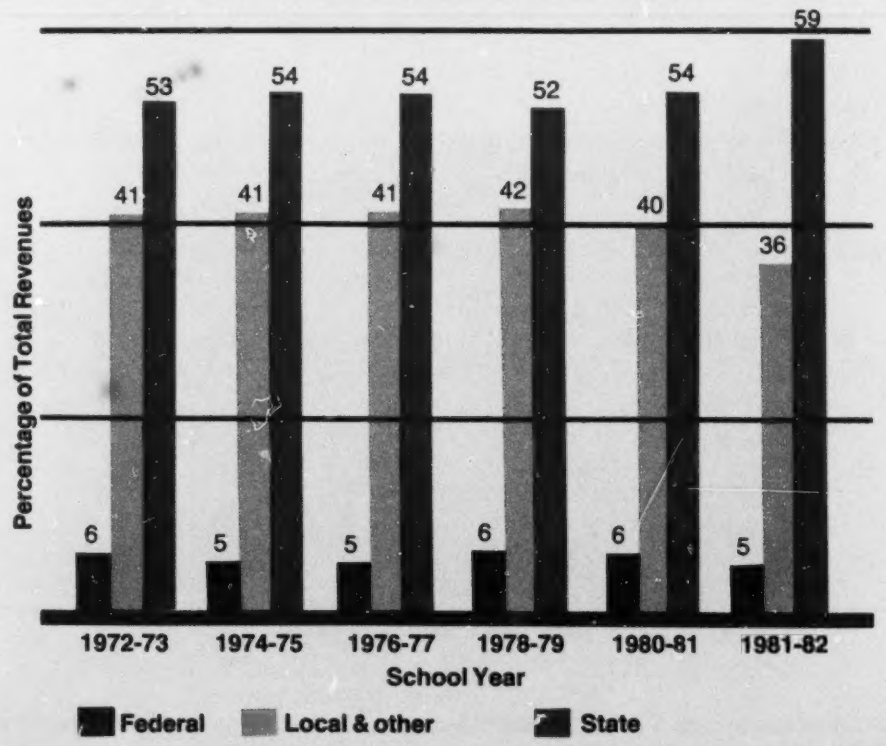


Two changes occurred in 1981-82. First, the federal percentage declined from 6 to 5; this was a result of reductions in federal aid to education.

Second, the percentage of revenue from local and other sources declined from 40 to 36, and the percentage from state sources increased from 54 to 59. This shift was caused primarily by changes in the state and local shares of the foundation aid program. The required local mill rate was reduced from 24 mills to 21 mills, and the state total of adjusted assessed valuation increased very little; as a result, the state total of the local basic maintencance levy declined by nearly $35 million. To compensate for this reduced local levy, coupled with an increase in the formula allowance from $1265 to $1333 per pupil unit, state foundation aid increased by $80 million.[2]

Figure 3

Sources of Minnesota School District Revenues 1972-73 through 1981-82



As noted in the preceding section, the school property tax rate was substantially higher in 1982 than it was in 1981. Since taxes payable in 1982 are considered local revenue for the 1982-83 school year, the local percentage of revenue is likely to increase in 1982-83, and the state percentage is likely to decrease.

Operating Expenditures

The state total of K-12 operating expenditures per pupil unit for 1981-82 was $2274. This was 9.6 percent higher than the 1980-81 total.

Table 4 shows that 60.1 percent of the 1981-82 total was spent on instruction, 15.0 percent on other services to students, 10.9 percent on operations and maintenance, 8.7 percent on administration, and 5.2 percent on other operating programs.

The percentage of operating budgets spent on instruction increased from 58.6 percent in 1980-81 to 60.1 percent in 1981-82. This represents a re-

[2]For an explanation of foundation aid and school finance, see: Minnesota Department of Education, *The ABCs of Minnesota School Finance* (St. Paul, 1982).

versal of a decade-long trend. Although comparable expenditure data are not available for years prior to 1980-81, similar data show a continuous decline from 1973 through 1980 in the percentage of budgets spent on instruction.[3] The chief reason that the percentage increased in 1981-82 is that median teacher salaries increased by a higher percentage than in any year since 1971.[4] Thus, the cost of instruction increased more than other parts of school district budgets.

The percentage of budgets spent on operations and maintenance also increased, from 10.6 percent in 1980-81 to 10.9 percent in 1981-82. This increase was probably caused by rising fuel prices, coupled with an unusually cold winter.

The percentages of budgets spent on administration, other student services, and other operating programs all declined between 1980-81 and 1981-82.

Table 4

State Totals of K-12 Operating Expenditures per Pupil Unit, 1980-81 and 1981-82

		1980-81		1981-82	
	Category	Expend-itures	% of Total	Expend-itures	% of Total
18.	District and school administration	$ 130	6.3	$ 146	6.4
19.	District support services	59	2.8	53	2.3
	Subtotal, Administration	$ 189	9.1	$ 199	8.7
20.	Regular instruction	$ 918	44.2	$1015	44.6
21.	Vocational instruction	44	2.1	55	2.4
22.	Exceptional instruction	187	9.0	225	9.9

Operating Fund Balances

Throughout the late 1970s, most Minnesota school districts spent less money than they received, choosing to build up balances in their operating funds. But Table 5 shows that the state total operating fund balance dropped by $8 per pupil unit in 1980-81, and by $27 per pupil unit in 1981-82. This means that operating fund expenditures exceeded revenues for the state as a whole. In 1981-82, 62 percent of the state's school districts experienced declines in their operating fund balances; there were 65 districts (15 percent) in which the decline exceeded $150 per pupil unit.

These declining fund balances are signs that the operating budgets of most school districts are extremely tight, and that many districts are struggling to balance their budgets while maintaining quality educational programs.

Table 5

State Totals of Change in Operating Funds Balance, per Pupil Unit, 1976-77 to 1981-82

School Year	Change in Funds Balance Per Pupil Unit
1976-77	+ $ 3
1977-78	+ 47
1978-79	+ 50
1979-80	+ 54
1980-81	− 8
1981-82	− 27

County Number and Name School District Name	District Number	1981–82 Resident Average Daily Membership					Pupil Data			Professional Staff		Tax Rates			
		1. Pre-Kindergarten Handicapped	2. Kindergarten	3. Elementary (Grades 1-6)	4. Secondary (Grades 7-12)	5. Total (Pre-K thru Grade 12)	6. Percent Minority	7. Percent Attendance	8. Percent Transported	9. Total Staff (FTE)	10. Pupil-Staff Ratio	11. Auditor Mills	12. EARC Mills		

The tables on pages 10 through 39 contain 38 separate statistics for each school district, county, and region in the state. Definitions of these 38 statistics are given below. All data are for the 1981-82 school year.[1]

1981-82 Resident Average Daily Membership

Average daily membership (ADM) is the average number of pupils in membership during the school year. Pupils need not be *in attendance* to be counted in ADM, but they must be *in membership* (i.e., currently enrolled in the district). For example, a pupil who is enrolled for the entire school year counts as 1.0 ADM; a pupil who is enrolled for exactly half the school year counts as 0.5 ADM.

The ADM counts in this report are, more specifically, counts of *total resident ADM*. They include all district residents who were enrolled in their home district, plus residents who were educated in other districts and for whom the home district paid tuition. Resident ADM counts are used in calculating foundation aid payments and property tax levy limitations.

1. **Prekindergarten Handicapped** — ADM of prekindergarten students enrolled in special education programs.
2. **Kindergarten** — ADM of students enrolled in kindergarten classes.
3. **Elementary, Grades 1-6** — ADM of students enrolled in grades 1-6, including students in elementary-level ungraded and special education classes.
4. **Secondary, Grades 7-12** — ADM of students enrolled in grades 7-12, including students in secondary-level ungraded and special education classes.
5. **Total** — Total ADM of all district residents, prekindergarten through grade 12; this is the total of columns 1 through 4.

Pupil Data

6. **Percent Minority** — The percentage of the district's students who are of American Indian, Alaskan, Black, Asian, or Hispanic origin.
7. **Percent Attendance** — The average ratio of days attended to days enrolled, for all students in the district.
8. **Percent Transported** — The number of public school students transported to and from school twenty or more days, as a percentage of the district's total enrollment.[2]

Professional Staff

These statistics provide information about each district's professional staff. Staff are counted in full time equivalents (FTE). For example, a full time staff member is counted as 1.0 FTE; one employed only half time is counted as 0.5 FTE. Staff counts include only elementary-secondary personnel; post-secondary teachers and administrators are excluded.

9. **Total Staff FTE** — The total number of licensed professional staff employed by the district, measured in full time equivalents (FTE). This count includes administrators, classroom teachers, and all other licensed professional personnel.
10. **Pupil-Staff Ratio** — The average daily membership of all students (both residents and nonresidents) who were enrolled in the school district, divided by the number of professional staff (column 9).

Tax Rates

These figures show the tax rates, expressed in mills, for school district property taxes payable in 1982. Taxes payable in 1982 provide revenue for the 1982-83 school year.

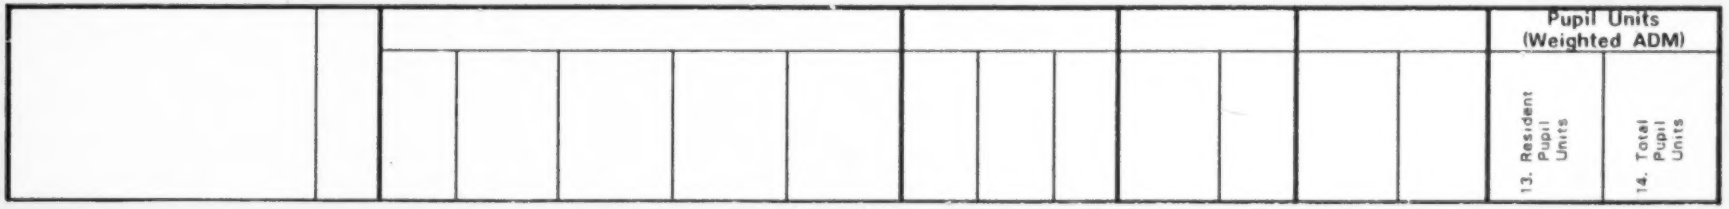
11. **Auditor Mills** — The actual school district tax rate, as determined by the county auditor. If the auditor tax rate is 50 mills, then a property owner would be taxed $50 for each $1,000 of assessed value. Because of differences in local property assessment practices, comparisons of auditor tax rates among districts may be invalid.
12. **EARC Mills**[3] — This rate is computed by multiplying the district's auditor tax rate times the 1981 market sales ratio. The market sales ratio is essentially the estimated average ratio of the market value (as determined by local assessors), to the actual selling price, for taxable property in the school district. Market sales ratios are less than 1.0, so each district's EARC mill rate is less than its auditor mill rate. Market sales ratios are compiled by the Minnesota Department of Revenue, and formally published by the Equalization Aid Review Committee, or EARC.

    This technique is intended to compensate for differences in assessment practices. Thus, when comparing the level of gross tax burden in various districts, EARC tax rates provide a better comparison than auditor tax rates.

[1] There are three exceptions to this general rule. The two tax rate statistics (columns 11 and 12) are for taxes payable in calendar year 1982; these taxes will provide revenue for the 1982-83 school year. The EARC value (column 38) is based on property values in 1981; this figure will be used in computing state aids and tax levy limitations for the 1983-84 school year.

[2] For some school districts and some categories of students, the counts of students transported were estimated for column 8.

[3] For districts in the Twin Cities area which are members of a special intermediate vocational-technical district (districts 287, 916, and 917), the EARC mill rate shown in column 12 includes a small additional tax rate for the special intermediate district. This additional tax rate is not included in the auditor mill rates, nor is it included in the county, region, or state EARC mill rates.



Pupil Units (Weighted ADM)

13. **Resident Pupil Units** — This figure is computed by applying weightings to the district's resident average daily membership (ADM), which is shown in columns 1 through 5. Each kindergarten ADM counts as 0.5 pupil units; each prekindergarten, kindergarten handicapped, and elementary ADM counts as 1.0 pupil unit; and each secondary ADM counts as 1.4 pupil units. Resident pupil units are used in calculating the district's state foundation aid payments and property tax levy limitations.
14. **Total Pupil Units** — This figure includes the district's resident pupil units (column 13) plus the weighted ADM of two other groups of students: 1) students who reside in other districts but are enrolled in this district [4], and 2) nonpublic school students who attend the public school part-time for specific classes or services.[5]

Revenue Percentages

These three columns show the percentage of each district's revenues from the federal government, the state government, and local and other sources. The percentages are based on all 1981-82 revenue reported by each district, except for proceeds from sales of real property and equipment, insurance recoveries, sales of bonds, loans, and interfund transfers.

15. **Federal** — The percentage of revenues from the federal government.
16. **State** — The percentage of revenues from the Minnesota state government, including foundation aid, property tax credits that are paid to the school district, and all other state payments to school districts.
17. **Local and Other** — The percentage of revenues from local and other sources. This category includes revenues from property taxes, interest, rent, gifts, tuition and fees, sales of assets other than real property and equipment, payments from other school districts, and all other sources except for federal and state government.

1981-82 Expenditures Per Pupil Unit

Columns 18 through 33 show each district's 1981-82 expenditures in sixteen different categories, divided by total pupil units (column 14). Columns 18 through 30 include all expenditures for the indicated purpose, except capital expenditures.

18. **District and School Administration** — Expenditures for the school board and for the offices of the superintendent, principals, and any other administrators who supervise principals.
19. **District Support Services** — Expenditures for central office administration that is not directly related to instruction, pupil support (see #24), or community services (see #30). Examples include expenditures for business services, data processing, legal services, personnel office, printing, and school census.
20. **Regular Instruction** — Expenditures for elementary and secondary classroom instruction, not including vocational instruction (#21) and exceptional instruction (#22), and for cocurricular and extracurricular activities. Examples include salaries of teachers, classroom aides, and coaches, and expenditures for classroom supplies and textbooks.
21. **Vocational Instruction** — Expenditures in elementary and secondary schools for instruction that is related to job skills and career exploration. Examples include expenditures for home economics, industrial, business, agriculture, and distributive education.
22. **Exceptional Instruction** — Expenditures for instruction of students who, because of atypical characteristics or conditions, are provided educational programs that are different from regular or vocational instructional programs. Examples include expenditures for special instruction of students who are educationally deprived, gifted and talented, or mentally retarded; for students with physical, hearing, speech, and visual impairments; and for students with special learning and behavior problems.
23. **Instructional Support Services** — Expenditures for activities intended to help teachers provide instruction, not including expenditures for principals or superintendents. Examples include expenditures for assistant principals, curriculum development, libraries, media centers, audio-visual support, staff development, and computer assisted instruction.
24. **Pupil Support Services** — Expenditures for all non-instructional services provided to students, not including transportation and food. Examples include expenditures for counseling, guidance, health services, psychological services, and attendance and social work services.

[4] In computing total pupil units, students who are residents of one school district but attend school in another district are counted in both districts, if the resident district pays tuition to the district attended. In 1981-82 there were 6,500 students (4,960 pupil units) in this category. Thus the state total of pupil units in column 14 of this report includes some double counting. This measure of pupil units is used because it provides the most valid comparison with expenditures. If these students were counted only in their resident district or only in the district attended, the expenditures per pupil unit would be unrealistically high in the other district.

[5] These nonpublic school students, often called "shared time" students, were not included with total pupil units prior to the 1980-81 issue of *School District Profiles*. For the state as a whole, they represent only 1759 pupil units, which is less than 0.2 percent of total pupil units. In a few school districts, however, they make up a significant share of total pupil units. For these school districts, the inclusion of shared time students causes an increase in total pupil units, and a slight decrease in all categories of expenditures per pupil unit (columns 18-33, and column 36).

District Number	Revenue %			1981 – 82 Expenditures per Pupil Unit															Other Measures per Pupil Unit				
	15. Federal	16. State	17. Local and Other	18. District and School Admin.	19. District Support Services	20. Regular Instruction	21. Vocational Instruction	22. Exceptional Instruction	23. Instructional Support Services	24. Pupil Support Services	25. Operations and Maintenance	26. Food Service	27. Pupil Transportation	28. Other Oper. Program	29. Total K-12 Operating Expenditures	30. Community Service	31. Capital Outlay	32. Building Construction	33. Debt Service	34. Operating Funds Balance	35. Change in Funds Balance	36. State and Local Oper. Costs	37. Long Term Debt	38. 1981 EARC Value

25. **Operations and Maintenance** — Expenditures for operation, maintenance, and repair of the district's buildings, grounds, and equipment. Examples include expenditures for custodians, fuel for buildings, electricity, telephones, and repairs.

26. **Food Service** — Expenditures for the preparation and serving of meals and snacks to students.

27. **Pupil Transportation** — Expenditures for transportation of students, including salaries, contracted services, fuel for buses, and other expenditures.

28. **Other Operating Programs** [6] — Includes all operating expenditures that were not charged to any other category (columns 18-27).

29. **Total K-12 Operating Expenditures** — The total of the eleven preceding categories of expenditures (columns 18 through 28). This figure includes all expenditures incurred for the benefit of elementary and secondary education during the 1981-82 school year, except capital and debt service expenditures.

30. **Community Service** — Expenditures for recreation, civic activities, adult education, early childhood education, or similar programs which are not conducted primarily for elementary and secondary students, and for noncredit summer school programs.

31. **Capital Outlay** — All expenditures for acquisition or replacement of assets that have benefits for more than one year, except expenditures for construction of new buildings and additions (see #32). Includes expenditures for purchase of land and equipment, for remodeling and improvements to existing buildings, and for leasing of equipment and buildings.

32. **Building Construction** — Expenditures for construction of new buildings and additions, including payments to contractors, costs of advertising for contracts, architects' and engineers' fees, costs of paint and decorating, costs of equipping new buildings, and all other related costs.

33. **Debt Service** — Expenditures for repayment of long term debt (see #37), including payments of principal and interest on bonds and loans.

Other Measures Per Pupil Unit

34. **Operating Funds Balance** — This figure is a measure of the district's financial condition at the end of the 1981-82 school year, and of how much resources are available to be used in future years. It is equal to the sum of the unappropriated fund balances on June 30, 1982, from the four operating funds (general, food service, pupil transportation, and community service funds), excluding the amount of statutory operating debt, plus the appropriated fund balance for current use of taconite payments; this balance is then divided by 1981-82 resident pupil units (column 13).

35. **Change in Funds Balance** [7] — The difference between the district's operating funds balance on June 30, 1982 (see #34 above) and on June 30, 1981, divided by 1981-82 resident pupil units. This is essentially equal to the difference between the district's 1981-82 revenues and expenditures, for the four operating funds combined. Thus, a negative number indicates that the district's expenditures in the operating funds were greater than its revenues.

36. **State and Local Operating Costs** — This figure, also called adjusted maintenance cost, is often used to compare overall costs of education among districts. It is essentially the net cost per pupil unit of education that is financed through state and local funds. Many districts use it to determine how much tuition they will charge to nonresident students. It is computed as follows:

    Sum of all expenditures for current operation of the schools
        (doesn't include expenditures for transportation, community services, capital outlay, building construction, or debt service),
    Minus all revenue from the federal government,
    Minus revenue from sale of food and materials,
    Minus admission fees and gate receipts from school activities,

    All divided by 1981-82 total pupil units (column 14).

37. **Long Term Debt** — The amount of long term debt outstanding on June 30, 1982, divided by 1981-82 resident pupil units. Long term debt includes general obligation bonds and loans from the state.

38. **1981 EARC Value** — The 1981 adjusted assessed valuation of the district, as published by the Equalization Aid Review Committee (EARC), divided by 1981-82 resident pupil units. This figure is an indicator of the district's ability to raise revenue through local property taxes.

[6] Some school districts included all expenditures for employee benefits in the same programs as the employees' salaries. Thus, for example, health insurance for the superintendent is included with "district and school administration" (column 18), and benefits for teachers are included with instructional programs (columns 20, 21 and 22). Other districts reported all expenditures for employee benefits separately; for these districts, the expenditures show up in "other operating programs" (column 28). Because of this difference in accounting practices there is wide variation in the amounts reported in column 28.

[7] There are twenty school districts which received taconite payments under Laws of Minnesota for 1978, Chapter 746. For these districts the figure in column 35 is $20 to $30 lower than the change in the *unappropriated* operating funds balance per pupil unit, which is published in some other Department of Education reports.

The figures listed on the next six pages are, for each county, totals for all school districts which have their central offices in the county. Totals are also listed for the state's thirteen development regions and for the entire state. Counties are listed by region, with the regions in numerical order. The map on page 14 shows region and county boundaries.

The tables below list totals for all districts in each of ten enrollment size groups, based on 1981-82 resident average daily membership (ADM). For example, group 1 includes all districts with 244 or fewer ADM, and group 2 includes all districts with 245 to 314 ADM. Each group includes approximately ten percent of the state's school districts (i.e., 42 to 45 districts).

Unlike the other 432 districts listed in this report, the five districts in the table below do not directly operate both elementary and secondary schools. The first three districts (Nett Lake, in St. Louis County; Pine Point, in Becker County; and Winsted, in McLeod County) operate elementary schools, but their secondary students are transported to other districts. The other two districts (Franconia, in Chisago County; and Prinsburg, in Kandiyohi County) directly operate no schools, but contract with other districts for the education of their resident students.

Because of their unique structures and functions, it may be misleading to compare these districts to the elementary-secondary districts in this report. Data for these five districts are not included in the Summary Statistics Table or in the county, region, and state totals.

The chief purpose of this table is to permit easy comparisons of districts with similar enrollments. For example, a superintendent in a district with 600 pupils may want to examine the totals for group 5 (500 to 669 ADM), to see how his or her expenditures compare with other districts that are about the same size.

SUMMARY STATISTICS

The table below lists a variety of summary statistics for each of the 38 variables included in this report. The definitions at the right explain the meaning of these summary statistics.

This table may be used to better understand the distribution of a particular variable among Minnesota school districts. For example, percent attendance (column 7) varies little among districts, from a low of 86.0 to a high of 97.1. Ninety percent of the school districts are within the narrow range of 93.5 (5th percentile) to 96.6 (95th percentile). By contrast, percent transported (column 8) varies greatly, from a low of 12 to a high of 100.

The table may also be used to see how an individual school district compares with other districts in the state. Three examples illustrate this use of the data.

1. A district which has total K-12 operating expenditures (column 29) of $2,200 per pupil unit is very near the median value, which is $2,208. Thus, about half the districts in the state have lower expenditures and half have higher expenditures.

2. A district with a pupil-staff ratio (column 10) of 6.2 could see from this table that they have the lowest pupil-staff ratio in the state.

3. A district with total average daily membership (column 5) of 340 students is between the 20th and 25th percentiles for this variable. Thus, between 20 and 25 percent of Minnesota school districts have fewer students than this district.

Definitions

Lowest value — For any specific variable, the lowest value of that variable among all 432 school districts. For example, the lowest EARC mill rate (column 12) for a Minnesota school district is 15.71 mills. The table also shows the highest value for each variable.

XXth percentile — For any specific variable, a value chosen such that XX percent of the school districts are below the chosen value. For example, the 10th percentile for total staff (column 9) is 20; this means that approximately 10 percent of the school districts have fewer than 20 staff members, and 90 percent of the districts have more than 20 staff. The 25th and 75th percentile are also called quartiles; the 10th, 20th, 30th, ...through 90th percentiles are also called deciles.

Median — For any specific variable, a value chosen such that half of the school districts are below the chosen value, and half are above. For example, the median number of resident pupil units (column 13) is 787. This means that half the school districts have fewer than 787 resident pupil units, and half have more than 787.

State Total — For variables 1-5 (1981-82 resident average daily membership), 9 (total staff), and 13-14 (pupil units), the state total is simply the sum of the corresponding value for all 432 districts listed in the report. For all other variables, the state total is computed as the sum of the numerators for all districts, divided by the sum of the denominators. For example,

$$\text{State total pupil-staff ratio} = \frac{\text{State total of pupils}}{\text{State total of staff}}$$

For these variables, the state total is a form of weighted average.
